Economic Outlook

County of Wetaskiwin Director of Ag Services

Weed Control Act & Regulation Updates

Farming Smarter - Technology Shaping the Future of Agriculture

Discover how emerging technologies are changing the way agricultural operations are managed. Experts in agricultural drones, virtual fencing and smart agriculture research will share practical insights, real-world applications and what producers should consider before adopting these tools. Following the panel, the floor will open for attendees to ask questions, exchange experiences and discuss the opportunities and challenges of using new technology on the farm.

Celebrating 10 Years of ALUS Wetaskiwin-Leduc

Join us in celebrating the program's impact in the region and recognizing a local producer's achievements.

WIN DOOR PRIZES FROM LOCAL BUSINESSES!

Tara Persson, True North Academy

Before the Will, Before the Plan: The Conversations Farm Families Need Most

Farm succession is often approached through legal, financial, and tax-planning questions, but those pieces are only part of a much larger human transition. In this keynote-workshop session, Tara Persson of True North Academy will help participants understand why the conversations farm families avoid can become some of the most costly parts of succession. Participants will leave with practical tools to begin those conversations with greater confidence, clarity, and care.

Start your day with coffee & refershments and enjoy a delicious lunch catered by Buck Lake Café!

Register by November 19th. Scan the QR Code, visit jedialberta.com or call 780-361-6232.
